

2020 - a rollercoaster ride

Global Matters Weekly

20 July 2020

– James Klempster, CFA

How to sum up 2020 so far? A rollercoaster is probably the best way to describe it; both from an emotional perspective but also in terms of what the markets have been up to. Over the first quarter, market participants went from being blissfully ignorant to a state of panic as the significance of global lockdowns became apparent and investors were left wondering what the crisis would mean for the economy and companies; not to mention the humanitarian cost.

The human impact has been deep and terrible, but this is not the first pandemic we have faced nor will it be the last. Humanity is resourceful, agile, adaptable and humanity will find ways to exist and flourish again despite the virus

At the start of the lockdown we made the strong case that while the short-term risks are large and palpable, the virus wasn't unpicking the very fabric of society nor the efficacy of capital markets to reward judicious investments. Some businesses will fall by the wayside through this extraordinarily difficult period, but to presume that all businesses would be materially wounded in perpetuity seemed too gloomy a prediction for us. Added to this was the certainty that we will, collectively get through the short-term pain caused by the virus. The human impact has been deep and terrible, but this is not the first pandemic we have faced nor will it be the last. Humanity is resourceful, agile, adaptable and humanity will find ways to exist and flourish again despite the virus.

Now that we have retraced much of the falls, the question is 'how much is in the price?' We feel that much of the developed world is through the period of maximum economic pain. The self-imposed lockdowns are being tentatively unwound and while we are yet to see concrete evidence in the economic data, we can assume that the last month or so will see an improvement in terms of consumption. If we continue on this trajectory, the second half of 2020 may make up some of the huge amount of lost ground from the first half.

Whether the economic recovery is V shaped remains to be seen, but the performance of stocks is unquestionable – the market recovery has almost been as sharp as the pullback earlier in the year, meaning that global investors have had to weather both a bear and a bull market within a matter

of weeks. It's not surprising that investors are feeling a little punch drunk, and a period of relative inactivity in the markets provides an opportunity for us all to take stock and reassess how we think things will go from here.

The best businesses, even in these chastened sectors, will find a way to prosper but the weak could perish

When considering the impact on businesses, some will be deeply scarred by this crisis. It is difficult to envisage business travel, for example, returning to 2019 norms for the foreseeable future. It is difficult to see how leisure businesses will be anything but hamstrung by social distancing and cleanliness requirements. The best businesses, even in these chastened sectors, will find a way to prosper but the weak could perish. That is why balance sheet strength and good management are key and that is why we believe active management of investment portfolios still has such a pivotal role to play. The best active managers are able to identify the businesses that are best placed to succeed - even in otherwise unloved corners of the stock market.

We must resist the urge to be too reactionary about the longer-term impacts of this crisis

We must resist the urge to be too reactionary about the longer-term impacts of this crisis, however. Social distancing has been effective and at the start we dutifully followed the stringent rules despite recent signs of fatigue. The virus has demonstrated how seamlessly we can work remotely and converse globally without getting on a plane and yet, a virtual conversation still lacks the nuance of true human interaction. A couple of months holed up at home does not roll back on millennia of evolution, and so assumptions that office space, airlines and physical retail stores are all relics are likely to be overdone.

The Marketplace

- Cases of Covid-19 have reached 14 million globally with over 600k fatalities
- The S&P 500 reached its highest intraday level since February
- Brent crude fell -0.2% ending the week at \$43.1 a barrel
- Gold rose 0.7% to end the week at \$1810.4 an ounce

Market Focus

US

- The CPI reading for June was 0.6% year-on-year, meeting expectations, with core inflation remaining at 1.2%
- Only 6 states currently have an R number under 1
- Industrial production rose by 5.4% in June against 4.3% expected
- Initial weekly jobless claims for the week through 11th July came in at 1.3m, higher than expected. However, this was the 15th consecutive weekly decline
- The US have denounced China's claim to the South China Sea – overturning their deep-rooted policy of not taking a side in disputes in the region
- Biotechnology firm Moderna announced that their Covid-19 vaccine produced antibodies in all patients tested in the early round of trials, leading the vaccine to move into a later-stage trial
- President Trump ended Hong Kong's special status with the US and signed legislation that would sanction Chinese officials responsible for stopping political dissent in the city

Europe

- The EU recovery fund summit moves into its fourth day

- of negotiations as a possible compromise seems likely
- President Macron of France announced he wanted people to wear masks in all indoor public spaces by the start of August
- The President of the ECB said that the baseline was that they would use the full €1.35tn PEPP envelope, barring positive data surprises
- President Macron announced an injection of another €100bn to support efforts to stop a big increase in unemployment

UK

- In May, GDP had a 1.8% month-on-month expansion against 5.5% expected Face masks will be compulsory in all shops from 24th July
- The CPI reading for June came in at 0.6% against 0.4% expected – the inflation rate's first rise since January
- Huawei will be completely removed from the UK's 5G networks by the end of 2027 and all purchases of any new 5G equipment from Huawei will be banned at the end of this year
- PM Johnson announced plans to increase antigen testing for Covid-19 to 500k a day by the end of October
- The ONS' early indicator for June suggested that the number of employees on payroll was down -650k compared to March

Asia/Rest of The World

- China's Q2 GDP was 3.2% year-on-year against 2.4% expected
- Brazil passed 2m confirmed cases with over 75k fatalities
- Hong Kong tightened public gatherings to four people and ordered gyms and bars to close for a week
- The latest growth forecasts for Japan are revised down, pointing to a deeper economic slump this year
